The Dermatology Clinical Research Fellowship in Cutaneous Oncology at Memorial Sloan Kettering Cancer Center is a highly selective, academically focused program with a distinguished history dating back to 2003. Designed as a 12–24 month fellowship, the program provides advanced training in the diagnosis and management of skin cancers, including melanoma and cutaneous T-cell lymphoma, while cultivating rigorous skills in clinical research. All fellows complete a mandatory first year, with an exceptional subset invited to pursue a second year based on outstanding productivity and demonstrated potential for a career in academic cutaneous oncology.

Fellows benefit from individualized training that integrates didactic education, mentored clinical exposure, and hands-on research within a world-class cancer center. The curriculum emphasizes epidemiology, imaging technologies, and scholarly output, with fellows expected to contribute to national presentations and peer-reviewed publications. Training is supported by a multidisciplinary faculty that includes leaders in dermatology, biostatistics, imaging science, and artificial intelligence, offering fellows unparalleled mentorship and access to cutting-edge resources in both

## **Deadline**

July 1, 2026

## **Length of Program**

1 to 2 years

## **Eligibility**

Completion of an accredited Residency in Dermatology

## **Number of Positions**

1

## **How to Apply**

We are currently accepting applications for the 2026-27 Academic year. Please apply at
