rounds, a weekly disease-specific didactic lecture series, a morbidity and mortality conference, a research conference, and disease-specific working groups. Students are expected to prepare and present a urologic oncology case with a complete review of the literature for Genitourinary Oncology Grand Rounds. Additional opportunities are available for students to do research work with attending staff on ongoing projects. By the end of the rotation, students are expected to have a full appreciation of the clinical characteristics and major treatment approaches to GU malignancies. Students will also gain an appreciation for the impact of treatment on a patient's quality of life.

## Learning Objectives

At the end of the clerkship, students should be able to perform a complete history and physical examination with special attention to 5 major urological oncology diseases (bladder cancer, kidney cancer, prostate cancer, testis cancer, penile cancer).

At the end of the clerkship, students should know the TMN staging system for the aforementioned major urological cancers.

At the end of the clerkship, the students should know the basic laboratory and imaging work up for each of the aforementioned urological cancers.

At the end of the clerkship, the students should know the major treatment options for each of the aforementioned clinically localized urological cancers.

**For the program calendar, please see the elective module dates section of our website.**
