a [cancer-specific retail pharmacy](#)

supportive services, including [integrative medicine](#), [genetic counseling](#), pain management, [lymphedema](#) therapy, [social work](#), and [nutrition](#)

Some of our services are available on Saturdays. Please ask your provider for more information.

Care Team

At Memorial Sloan Kettering, doctors, nurses, and other specialists work together on treatment teams for each patient. This means that your care team is highly experienced in caring for people with the type of cancer you have. In addition to your medical care, your team will also develop a plan to care for your total well-being, including support for your family and loved ones.

For most cancers, your treatment will be led by one or more primary doctors. These could include a medical oncologist, a surgical oncologist, a radiation oncologist, and, for some cancers, an interventional radiologist. Each of these doctors brings a defined set of expertise and techniques for treating cancer.
