Annual report
Give to MSK

Our social workers stay in close contact with families to meet any practical and psychosocial needs. Social workers provide counseling, information, and assistance throughout treatment and can direct you toward more help. Our child life specialists, teachers, patient and program coordinators, and session and physician-office assistants also work together to help your child and family in the hospital and at home during treatment periods.

Find more information about our experts below. To make an appointment, please call the Department of Pediatrics at 833-MSK-KIDS.
