Many children have received treatment at MSK for the same disease as your child. You may find it helpful to speak with other patients or families who have had similar experiences. Please feel free to ask [your child's care team](#) to arrange for you to speak with some former patients and their families.

We also offer a broad range of support programs that help children, family members, and caregivers cope with the range of issues related to life during and after treatment.

Child life specialist Alyson Silver is one of the many members of our pediatric psychosocial support team.
