Education

Johns Hopkins University

Dr. Allison Lipitz-Snyderman is a health services researcher in the Department of Epidemiology and Biostatistics at Memorial Sloan Kettering Cancer Center. Her research focuses on: 1) measuring and addressing the quality and safety of cancer care delivery; 2) evaluating the impact of new initiatives, including digital technologies, on clinical and utilization outcomes; and 3) assessing disparities in clinical trial enrollment. She also works with the MSK DigITs (Digital Informatics & Technology Solutions) team, providing methodological support for value and outcomes assessments of healthcare technology initiatives. She has expertise directing studies using data sources such as large-scale national claims, cancer registries, and electronic medical records. She also serves as Co-Chair of the MSK Cancer Alliance Cancer Control and Population Sciences Sub-committee. Her research has been supported by the National Cancer Institute, the National Comprehensive Cancer Network, the National Institute for Healthcare Management Foundation, and AARP/NQF/OptumLabs, among others.

Disclosures

Members of the MSK Community often work with pharmaceutical, device, biotechnology, and life sciences companies, and other organizations outside of MSK, to find safe and effective cancer treatments, to improve patient care, and to educate the health care community. These activities outside of MSK further our mission, provide productive collaborations, and promote the practical application of scientific discoveries.

MSK requires doctors, faculty members, and leaders to report (“disclose”) the relationships and financial interests they have with external entities. As a commitment to transparency with our community, we make that information available to the public. Not all disclosed interests and relationships present conflicts of interest. MSK reviews all disclosed interests and relationships to assess whether a conflict of interest exists and whether formal COI management is needed.
