Education

Oxford University, UK

Andrew Vickers

1/3

Current Research Interests

Dr. Vickers has conducted extensive methodologic and empirical research in clinical trials, patient-reported outcomes, prediction modelling and molecular markers. He developed novel, streamlined, trial methodologies that have allowed large randomized trials to be conducted at very low cost; spearheaded methods for adapting patient-reported outcomes instruments into clinical care; created decision curve analysis, now a routine statistical method for the evaluation of prediction models; was the statistician behind the 4Kscore, the first laboratory test to give a predicted probability of disease, and which is in wide use in urologic practice to inform decisions about prostate biopsy. A particular focus of Dr. Vickers' work is the detection and initial treatment of prostate cancer, having published on the prognostic value of baseline PSA, the surgical learning curve, PSA velocity, MRI-targeting, Gleason grading and active surveillance. Dr Vickers has a strong interest in teaching statistics. He is course leader for the MSK biostatistics course and is author of the introductory textbook "What is a p-value anyway?". Dr. Vickers spearheads a number of innovative informatics initiatives throughout MSK, including patient-reported outcomes, part of his work as Co-Director of the PRO-CEL Core Facility, and the Amplio surgical quality assurance system.

Publications

Selected peer-reviewed publications:

Touijer KA, Vertosick EA, Sjoberg DD, Liso N, Nalavenkata S, Melao B, Laudone VP, Ehdaie B, Carver B, Eastham JA, Scardino PT, Vickers AJ. Pelvic Lymph Node Dissection in Prostate Cancer: Update from a Randomized Clinical Trial of Limited Versus Extended Dissection. *Eur Urol*. 2025 Feb;87(2):253-260. doi: 10.1016/j.eururo.2024.10.006. Epub 2024 Oct 29. PMID: 39472200.

Vickers AJ, Ehdaie B, Tokita HK, Nelson J, Matros E, Pusic AL, D'Angelica M. Successful completion of large, low-cost randomized cancer trials at an academic cancer center. *Clin Trials*. 2025 Feb;22(1):36-44. doi: 10.1177/17407745241284044. Epub 2024 Oct 15. PMID: 39410769; PMCID: PMC11810578.

Vertosick EA, Häggström C, Sjoberg DD, Hallmans G, Johansson R, Vickers AJ, Stattin P, Lilja H. Prespecified 4-Kallikrein Marker Model at Age 50 or 60 for Early Detection of Lethal Prostate Cancer in a Large Population Based Cohort of Asymptomatic Men Followed for 20 Years. *J Urol*. 2020 Aug;204(2):281-288.

Vickers AJ, Ulmert D, Sjoberg DD, Bennette CJ, Björk T, Gerdthsson A, Manjer J, Nilsson PM, Dahlin A, Bjartell A, Scardino PT, Lilja H. Strategy for detection of prostate cancer based on relation between prostate specific antigen at age 40-55 and long term risk of metastasis: case-control study. *BMJ*. 2013 Apr 15;346:f2023.

Vickers AJ, Elkin EB. Decision curve analysis: a novel method for evaluating prediction models. *Med Decis Making*. 2006 Nov-Dec;26(6):565-74.

Disclosures

Members of the MSK Community often work with pharmaceutical, device, biotechnology, and life sciences companies, and other organizations outside of MSK, to find safe and effective cancer treatments, to improve patient care, and to educate the health care community. These activities outside of MSK further our mission, provide productive collaborations, and promote the practical application of scientific discoveries.

MSK requires doctors, faculty members, and leaders to report ("disclose") the relationships and financial interests they have with external entities. As a commitment to transparency with our community, we make that information available to the public. Not all disclosed interests and relationships present conflicts of interest. MSK reviews all disclosed interests and relationships to assess whether a conflict of interest exists and whether formal COI management is needed.

Andrew Vickers discloses the following relationships and financial interests:

- Arctic Partners
 - Intellectual Property Rights
- Combat Medical Ltd
 - Professional Services and Activities
- European Association of Urology
 - Professional Services and Activities
- Gryphon
 - Professional Services and Activities (Uncompensated)
- OPKO Health, Inc.
 - Equity
- PROCEPT BioRobotics Corporation
 - Professional Services and Activities

The information published here is a complement to other publicly reported data and is for a specific annual disclosure period. There may be differences between information on this and other public sites as a result of different reporting periods and/or the various ways relationships and financial interests are categorized by organizations that publish such data.

This page and data include information for a specific MSK annual disclosure period (January 1, 2024 through disclosure submission in spring 2025). This data reflects interests that may or may not still exist. This data is updated annually.

Learn more about MSK's COI policies [here](#). For questions regarding MSK's COI-related policies and procedures, email MSK's Compliance Office at ecoi@mskcc.org.
