Current Research

Ms. Reiner's research is in both clinical and epidemiologic studies. She collaborates on clinical studies within the neurology and neurosurgery services at MSKCC. Ms. Reiner is also involved with health outcomes research using SEER Medicare data as well as the epidemiologic study: [The Women's Environmental Cancer and Radiation Epidemiology \(WECARE\)](#) study. The WECARE Study has a unique design: controls are women with unilateral breast cancer and cases are women with asynchronous bilateral breast cancer.

Ms. Reiner also serves as Randomization Coordinator of the Biostatistics Service with Jessica Lavery and Elyn Riedel and is responsible for the design and maintenance of the treatment allocation schema for the Center's randomized protocols.
