FOR THE MEDIA

Postdoctoral fellows gain broad exposure to the animal resource and research programs at Memorial Sloan Kettering Cancer Center, The Rockefeller University, and Weill Cornell Medicine (including the Hospital for Special Surgery's (HSS) Research Institute), the three participating organizations that make up the Tri-Institutional community. The three-year program consists of two major components: clinical, management, and administrative training and research training. In addition, fellows receive exposure to regulatory compliance and policy development by participating in the activities of each of the three participating institutions' Institutional Animal Care and Use Committees. Knowledge and skills are gained through both experiential and didactic activities.

- [Training Facilities](#)

The Tri-Institutional Training Program provides trainees access to world-class biomedical research facilities.

- [Training Description](#)

Learn about the training program at the Tri-Institutional Training Program in Laboratory Animal Medicine & Science. It consists of two main training components: clinical, management, and

administrative training and research training.

- [Faculty](#)

The faculty of the Tri-Institutional Training Program is composed of laboratory animal specialists, comparative pathologists, regulatory specialists, and veterinary scientists.
