## ABOUT US

[Our mission, vision & core values](#)

[Leadership](#)

[History](#)

[Equality, diversity & inclusion](#)

[Annual report](#)

[Give to MSK](#)

MSK's partnerships with industry. These activities are closely integrated for efficient translation into the clinic.

The Center for Experimental Therapeutics maintains close relationships with other Collaborative Research Centers at MSK. For example, the [Center for Molecular Imaging and Nanotechnology](#) provides collaborative opportunities for our scientists to work on nanotechnology-based drugs and imaging agents. Our research program also benefits greatly from the [Tri-Institutional Therapeutics Discovery Institute](#) (Tri-I TDI), a unique partnership between MSK, Weill Cornell Medical College, and Rockefeller University. The Tri-I TDI provides medicinal chemistry expertise that was not available to us prior to its launch, in 2013. In addition, the Tri-I TDI's partnership with Takeda Pharmaceuticals will add to our resources for developing small molecule therapeutic agents and molecular probes.
