FOR THE MEDIA

The Geoffrey Beene Cancer Research Center annually funds the top research proposals submitted by Memorial Sloan Kettering faculty members whose research supports the field of human oncology, human cancer pathogenesis, cancer biology, and cancer genetics.

- [Sample Funded Projects](#)

One of the major activities of the Geoffrey Beene Cancer Research Center is to provide investigators with seed funding for new and innovative projects. Here are some examples of previous and current grant recipients who have made major, cutting-edge advances in cancer research.

- [Geoffrey Beene Shared Resources Awards](#)

The Shared Resources Request for Applications funds the purchase of shared resources that will bring novel technologies to the research laboratories of Memorial Sloan Kettering Cancer Center.
