Get to Know Me

Dr. Scheinberg is a physician-scientist who specializes in the care of patients with leukemia and is also investigating new therapeutic approaches to cancer, both in the clinic and in the laboratory. His research is focused on discovering and developing novel, specific immunotherapeutic agents. These include monoclonal antibodies that target the cell surface of cancers, intracellular proteins, engineered cells, targeted radiopharmaceuticals that deliver radioactive particles including alpha particles or alpha particle nanogenerators, targeted nanodevices that selectively kill cancer cells, and therapeutic vaccines that target the oncogene products that cause the cancers.

Disclosures

Members of the MSK Community often work with pharmaceutical, device, biotechnology, and life sciences companies, and other organizations outside of MSK, to find safe and effective cancer treatments, to improve patient care, and to educate the health care community. These activities outside of MSK further our mission, provide productive collaborations, and promote the practical application of scientific discoveries.

MSK requires doctors, faculty members, and leaders to report ("disclose") the relationships and financial interests they have with external entities. As a commitment to transparency with our community, we make that information available to the public. Not all disclosed interests and relationships present conflicts of interest. MSK reviews all disclosed interests and relationships to assess whether a conflict of interest exists and whether formal COI management is needed.
