## About Me

Michael J. Morris

## What I Do at MSK

- Prostate Cancer Section Head, Genitourinary Oncology
- Steven A. Greenberg Chair in Prostate Cancer Research

## Get To Know Me

I am a board-certified medical oncologist who specializes in treating men with [prostate cancer](#), particularly those with metastatic disease (disease that has spread to distant organs) or those who are at a high risk for developing metastatic disease. I am the Prostate Cancer Section Head, which means I lead a group of experts at Memorial Sloan Kettering Cancer Center (MSK) who are dedicated to researching and treating this disease.

Much of my research focuses on drugs that can deliver radioactive molecules targeted specifically to prostate cancer cells or to the distant areas where the cancer spreads. These drugs can be used alone or in combination with other anti-cancer treatments. This research represents a team effort between medical oncologists, nuclear medicine doctors, and radiologists to bring these novel and exciting drugs to the people with prostate cancer who need them.
