[Annual report](#)

[Give to MSK](#)

BAIC Director of Radiology [Maxine Jochelson](#) details the benefits of being able to see multiple experts in radiology , medical oncology, surgery, and more in one visit. At the BAIC, these specialists work as a team in caring for each patient, commonly consulting with one another since they are in such close physical proximity. Diana Mott, a registered nurse, emphasizes the convenience of a facility in which a mammogram can be done in the same building that treatment is provided, for example.

“Our physical building is the embodiment of our belief that your breast cancer team is really a group of individuals working together for you,” Dr. Morrow explains. “So starting with a team who can take care of your needs from the beginning is the way to get the best possible cancer care.”
