Getting Rid of Unused Medicine With a DisposeRx® Kit

This information describes how to get rid of your unused medicine with a DisposeRx kit.

About getting rid of unused medicine

It's important to get rid of your unused medicine when you do not need them anymore. This will keep anyone from using them.

Some medicine, including narcotics (opioids), can be harmful or dangerous if you do not follow following your healthcare provider's instructions.

Most medicine cannot be flushed down the toilet or drain. Flushing unused medicine down the toilet or putting it down the drain can damage our water supply and harm wildlife. You can use a DisposeRx kit to safely get rid of your unused medicine.

What is a DisposeRx kit?

A DisposeRx kit has a powder that dissolves (melts) your medicine into a gel. This keeps anyone from using it and makes it safe to throw away in your regular trash.

You can request a DisposeRx kit at the MSK Retail Pharmacy locations at the end of this resource.

How to use a DisposeRx kit

To get rid of your unused medication with a DisposeRx kit:

1. Remove the prescription label from the pill bottle.
2. Open the pill bottle and fill it with warm water until it's $\frac{2}{3}$ full.
3. Empty the packet of the DisposeRx kit into the pill bottle.
4. Put the cap back on the pill bottle. Make sure the cap is on tight.
5. Shake the pill bottle for 30 seconds.
6. Throw the pill bottle and empty packet into the trash.

Do not eat, drink, or inhale (breathe in) the powder or gel.

For more information about using a DisposeRx kit, talk with your pharmacist.
