Applications are invited from engineering undergraduate freshmen, sophomores, and juniors interested in pursuing research at the interface of engineering and biomedicine. Applicants must have an engineering/physical sciences/computational background.

The 10-week program begins on June 7 and ends on August 7, 2021.

Participants will:

• Adapt their engineering skills to address biomedically-focused research questions in cutting-edge laboratories at Memorial Sloan Kettering and Weill Cornell Medicine.
• Interact with faculty, postdoctoral fellows, and graduate students.
• Attend a weekly luncheon seminar series of presentations by faculty.
• Attend professional development workshops.
• Present a poster on their work at the end of the program.
• Receive a stipend of $6,000 for the summer. Housing available.

We strongly encourage students from groups historically underrepresented in science (disadvantaged, disabled, Black, Hispanic/LatinX, Native American) to apply.

For more information, see a full description of the program at: mskcc.org/mesp-summer.

Students can complete and submit an online application at: sam.mskcc.org.

Deadline for receipt of applications: February 1, 2021
