

Molecular Imaging Summer Program (MISP)

A 10-week research experience on the NYC campus of Memorial Sloan Kettering Cancer Center

Applications are invited from undergraduate freshmen, sophomores, and juniors interested in pursuing research at the interface of molecular imaging and cancer biology. Applicants must have completed college-level general biology and introductory chemistry and have completed some advanced science courses.

The 10-week program begins on June 7 and ends on August 13, 2021.

Participants will:

- Adapt their biology and chemistry skills to address biomedically-focused imaging research questions in cutting-edge laboratories at Memorial Sloan Kettering Cancer Center.
- Interact with faculty, postdoctoral fellows, and graduate students.
- Attend a weekly luncheon seminar series of presentations by faculty.
- Attend professional development workshops.
- Present a poster on their work at the end of the program.
- Receive a stipend of \$6,000 for the summer. Housing available.
- Through the generous support of Telix Pharmaceuticals Limited (Melbourne, Australia) an additional fully-funded internship will be offered to an undergraduate student based in Australia. The application process and deadlines are the same.

We strongly encourage students from groups historically underrepresented in science (disadvantaged, disabled, Black, Hispanic/LatinX, Native American) to apply.

For more information, see a full description of the program at: mskcc.org/misp-summer.

Students can complete and submit an online application at: sam.mskcc.org.

Deadline for receipt of applications: February 1, 2021
