You are cordially invited to a two-day free symposium that will bring together established and junior investigators working in the epidemiology and biology of endometrial cancer and related fields. This symposium will include experts from epidemiology, biology, pathology, psychology, health policy, and clinical practice to exchange up-to-date findings and new ideas. The goal of the symposium is to identify high-priority research questions that will have a tangible impact on reducing incidence of and improving outcomes for endometrial cancer.

**Featured Speakers and Discussion Leaders**

**Day 1: March 17th 7:30am**

Endometrial Carcinogenesis:
- Douglas Levine, MD
- Marc Goodman, PhD
- Paul Goodfellow, PhD
- Diego Castrillon, MD, PhD
- Sue Hankinson, PhD

Pathology and Etiologic Heterogeneity:
- Wendy Setiawan, PhD
- Louise Brinton, PhD
- George Mutter, MD
- David Mutch, MD

Genetic Susceptibility and Gene-Environment Interactions:
- Karen Lu, MD
- Immaculata De Vivo, PhD
- David Hunter, PhD
- Peter Kraft, PhD

Risk Prediction and Early Detection:
- Ruth Pfeiffer, PhD
- Jen Prescott, PhD
- James Lacey, PhD
- Nicolas Wentzensen, MD, PhD
- Mia Gaudet, PhD

Racial Disparities in Risk and Survival:
- Michele Cote, PhD
- Larry Maxwell, MD
- Alexandra Shields, PhD
- Sara Olson, PhD

Adjourn at 5:00pm

**Day 2: March 18th 8:30am**

Obesity and Related Mechanisms:
- Marc Gunter, PhD
- Shingo Kajimura, PhD
- Ann Klopp, MD
- Faina Linkov, PhD
- Herbert Yu, MD, PhD

Survivorship and Quality of Life
- Karen Basen-Engquist, PhD
- Vivian von Gruenigen, PhD
- Marcela del Carmen, MD
- Immaculata De Vivo, PhD

Concluding session:

Working lunch with brief summaries from each of the discussion leaders, followed by discussion among all attendees to identify knowledge gaps and research priorities.

Adjourn at 2:00pm

This symposium is supported by grant R13 CA180637 from the National Cancer Institute

Principal Investigators: Immaculata De Vivo, PhD, Karen H. Lu, MD, Sara H. Olson, PhD, Wendy Setiawan, PhD
