TARGET AUDIENCE
This course is intended for practicing Pulmonologists, Intensivists and Thoracic Surgeons, as well as trainees, interested in advancing their understanding of thoracic ultrasound, pleural procedures, endobronchial ultrasound (EBUS), interventional bronchoscopy for diagnostics and therapeutics and airway management.

WORKSHOP DESIGN
1. EBUS-TBNA
2. Conventional TBNA
3. Radial probe EBUS
4. Navigational Bronchoscopy
5. Cytology: Specimen processing
6. Thoracic Ultrasound
7. Pleural Catheter placement
8. Fluoroscopy
9. Rigid Bronchoscopy
10. Intrabronchial Valves
11. Airway Stents and ablative technique
12. Percutaneous Tracheotomy
13. Bronchial Thermoplasty

COMMERCIAL SUPPORT
No commercial support has been provided for this activity. MSK does not accept commercial support for its CME activities.

ACCREDITATION STATEMENT
MSK is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

AMA CREDIT DESIGNATION STATEMENT
MSK designates this live activity for a maximum of 17.75 AMA PRA Category 1 Credits™. Physicians should only claim credit commensurate with the extent of their participation in the activity. The AMA has determined that physicians not licensed in the United States but who participate in this CME activity are eligible for 17.75 AMA PRA Category 1 Credits™.

FACULTY DISCLOSURE
It is the policy of MSK to make every effort to ensure balance, independence, objectivity, and scientific rigor in all continuing medical education activities which it sponsors as an ACCME accredited provider. In accordance with ACCME guidelines and standards, all faculty participating in an activity sponsored by MSK are expected to disclose any significant financial interest or other relationship with the manufacturer(s) of any commercial product(s) and/or provider(s) of commercial services which are discussed by the faculty members in an educational presentation and/or have provided support for this course. As required by the ACCME, when an unlabeled use of a commercial product or an investigational use not yet approved for any purpose is discussed during an educational activity, MSK requires the speaker to disclose that the product is not labeled for the use under discussion or that the product is still investigational.
Course Overview

This course is intended for practicing Pulmonologists, Intensivists and Thoracic Surgeons, as well as trainees, interested in advancing their understanding of thoracic ultrasound, pleural procedures, endobronchial ultrasound (EBUS), interventional bronchoscopy for diagnostics and therapeutics and airway management.

The hands-on portion of the course will be limited to 30 participants to allow for maximum interaction with course faculty and ample hands-on experience. After the 30 hands-on slots are filled, participants may register for the lecture-only portion.

Educational Objectives

At the completion of this course, participants should have an improved understanding of the science, application and performance of:

- Thoracic Ultrasound
- Ultrasound-Guided Pleural Procedures
- Endobronchial Ultrasound and Lymph Node staging
- Advanced Diagnostic Bronchoscopy for peripheral pulmonary lesions
- Specimen Processing
- Airway anatomy, interventions and management

Interventional Pulmonology Course

Thursday, September 25
