Clinical Informatics Fellowship

The Department of Pathology and Laboratory Medicine at Memorial Sloan Kettering Cancer Center offers one 2-year clinical informatics fellowship positions.

The clinical informatics fellowship program provides fellows with unique opportunities to develop general health informatics experience within a large enterprise. Trainees will learn leadership and management skills to advance informatics projects at the departmental and institutional levels. In addition, fellows will develop skillsets related to

the cutting-edge technologies available at MSK, including:

- Digital pathology
- Molecular pathology (genomics)
- Computational pathology (image analysis)
- Artificial intelligence (AI) development, deployment, and clinical validation

Previous experience in programming, data science, bioinformatics, and/or AI is preferred.

Number of Positions:

1 position available for 2027-2029

Length of Program: 1-2 Years

(starting July 1st)

How to Apply: Online Only

Three recommendation letters are required. Early application is strongly encouraged

Goals and Objectives

Upon completion of the fellowship, the fellow will be able to:

- Apply informatics principles to improve pathology and laboratory medicine practice.
- Design, implement, optimize, and evaluate pathology information systems across the system lifecycle.
- Lead pathology informatics initiatives within complex health care systems.
- Collaborate effectively with clinical, technical, administrative, and vendor stakeholders.
- Demonstrate professionalism, accountability, ethical practice, and commitment to lifelong

Recruitment

To be considered, candidates must have completed or anticipate completion of an ACGME-accredited pathology residency program before the start of the Clinical Informatics Fellowship. Candidates are also expected to be either board-certified or board-eligible.

Applications

To apply to the Clinical Informatics Fellowship Program, please complete and submit the application form and email it to cifellowship@mskcc.org.

The program is currently accepting applications for July 2027 - 2029
