8	\$278,600	\$23,217

**Determining FAP Eligibility-** To determine what a family can afford to pay, if anything, if your annual household income is equal to or less than the amount above for your family size you would be approved for our financial assistance program. This means we would accept whatever your insurance pays as payment in full for both hospital and physician bills.

If your annual household income is more than the amount, we allow we calculate a patient's household net monthly income and then deduct the total amount of routine monthly bills. The amount remaining is what we consider the patient able to afford each month. If a patient's household routine monthly bills are more than or equal to their net monthly income, we would accept whatever the patient's insurance pays as payment in full.

If you are not eligible for financial assistance due to having excess income once your monthly bills are deducted, we can offer discounts or reduced time payments.

**Assistance offered** – Eligible patients can receive a 100% discount or a reduction on their self-pay balances. MSK will not charge FAP eligible patients more than the amount billed to patients with insurance that covers medically necessary care.
