COURSE OVERVIEW

The use of pelvic MRI in routine clinical practice is growing rapidly, mainly due to the extensive literature supporting its clinical value and expanding clinical indications. This hands-on course will offer the opportunity to learn or brush up on pelvic MRI skills. Short lectures and whole case reviews on individual workstations will demonstrate the pearls and pitfalls in the evaluation of the following examinations performed for various clinical indications:

- Prostate MRI
- Gynecologic MRI
- Rectal MRI

Hands on review of cases will be intermixed with short didactic lectures. One workstation per participant.

EDUCATIONAL OBJECTIVES

- Become familiar with pelvic MRI indications, acquisition protocols and the normal appearance of male and female pelvic structures as visualized on MRI
- Identify abnormal findings on pelvic MRI and the relevance of these findings to patient care
- Recognize the imaging appearances of treated pelvic cancers and pelvic cancer recurrence
- Highlight the value of structured reporting and standardized lexicon in pelvic MRI

COURSE DIRECTORS

**Hedvig
Hricak
MD PhD**

**Chair, Department of
Radiology; Carroll and
Milton Petrie Chair**

As Chair of the Department of Radiology at Memorial Sloan Kettering Cancer Center, I am privileged to oversee a department renowned for its clinical excellence and innovation in anatomic imaging, molecular imaging, and therapy, and interventional radiology.

**H. Alberto
Vargas MD**

I am a diagnostic radiologist with specialist training in oncologic and molecular imaging. My clinical and research activities are centered on the use of advanced modalities such as diffusion-weighted and dynamic contrast-enhanced magnetic resonance imaging (MRI) and positron-emission tomography (PET) for the non-invasive diagnosis, staging, treatment response assessment and follow-up of patients with cancer.

**Evis Sala
MD PhD**

**Chief, Body
Imaging Service**

As member of the Gynecologic Cancer Disease Management Team and the Director of Gynecologic Imaging at MSK, I use my expertise in genitourinary cancer imaging to provide specialty care to our patients. My ongoing research is translational and includes assessing the role of functional MRI and PET/CT as a surrogate marker of tumor response to treatment in patients with ovarian and prostate cancer as well as quantification of tumor heterogeneity.

TARGET AUDIENCE

This course is directed towards practicing radiologists and radiologists in training.

COURSE DESIGN

This course includes hands-on review of cases which will be intermixed with short didactic lectures. One workstation per participant.

EVALUATION

A course evaluation survey sent out electronically will provide attendees with the opportunity to review the sessions and the speakers and to identify future educational needs.

ACCREDITATION STATEMENT

MSK is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

AMA CREDIT DESIGNATION STATEMENT

MSK designates this live activity for a maximum of **15 AMA PRA Category 1 Credits™**. Physicians should only claim credit commensurate with the extent of their participation in the activity. The AMA has determined that physicians not licensed in the United States but who participate in this CME activity are eligible for **15 AMA PRA Category 1 Credit(s)™**.

RANZCR CREDIT DESIGNATION STATEMENT

This course will be eligible for **19.5 CPD** points from **The Royal Australian and New Zealand College of Radiologists**.

FACULTY DISCLOSURE

It is the policy of MSK to make every effort to insure balance, independence, objectivity, and scientific rigor in all continuing medical education activities which it sponsors as an ACCME accredited provider. In accordance with ACCME guidelines and standards, all faculty participating in an activity sponsored by MSK are expected to disclose any significant financial interest or other relationship with the manufacturer(s) of any commercial product(s) and/or provider(s) of commercial services which are discussed by the faculty members in an educational presentation. As required by the ACCME, when an unlabeled use of a commercial product or an investigational use not yet approved for any purpose is discussed during an educational activity, MSK requires the speaker to disclose that the product is not labeled for the use under discussion or that the product is still investigational.

OUTCOMES MEASUREMENT SURVEY

Six months after the end of the course an Outcomes Measurement Survey will be sent to all participants to help us determine what positive impacts have been made on participant practice as a result of the course.
